Co-op Cost Cutters Bed Bug Package

I am happy to announce the launch of the Co-op Cost Cutters bed bug package. It was a long time in the making. I spoke with many co-ops, researched many companies and whittled the list down over time. Then, I began negotiations.

The resulting package we have put together has several options for dealing with bed bugs, as well as other pests. It includes Integrated Pest Management (IPM), bed bug sniffing dogs, support for members, traditional, new and alternative treatments, bug proof mattress covers and more. All companies offer a program discount. Co-ops get an additional program discount for the HD Supply products, on top of the listed price.

In talking with co-ops, it became clear that many co-ops face special challenges and no single company would be able to address them all. For that reason, we are offering several choices. A key to winning the bed bug battle is getting units ready for treatment. The package offers help with this daunting task.

Your feedback will be very important to me. Let me know if any of these services do not work well for you. Sometimes, it's a matter of finding the right fit.

Managing and preventing the spread of the bugs is as important as education and treatment. The package includes a list of products that will help maintain control.

I hope you will find the package helpful. It will be added to other bed bug information on the CHFT website, under Health & Safety.
